DETAILED ACTION

This Office Action is in response to an Election filed on 1/25/2005.

Currently, claims 1-32 are pending. Claims 22-32 are withdrawn.

Election/Restrictions

1. Applicant's election of claims 1-21 in the reply filed on 1/25/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 22-32 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected device, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/25/2005.

Specification

3. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2812

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Brown et al. (U.S. Patent No. 6,486,510 filed 12/12/2001)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Brown shows the method as claimed by Fig. 2 and corresponding text as: providing a semiconductor substrate (12); forming a non-dopant region (22) having a non dopant edge in the semiconductor substrate; and forming a dopant region (18 and 20) having a dopant edge in the semiconductor substrate, wherein said non-dopant region is within the dopant region and said non-dopant edge is aligned in spaced relation away from the dopant edge (col. 1, lines 40-49) (claim 1).

Allowable Subject Matter

6. Claims 2-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2812
